List of All AI Engines & Their Responsibilities (Zecpath)

1. Resume Parser AI

Responsibility:

- **Reads candidate resume automatically**
- **Extracts important details like skills, education, experience, projects**
- **Converts resume into structured data**

Purpose:
To reduce manual resume reading and speed up screening.

---

2. ATS Scoring AI

Responsibility:

- **Automatically shortlisted candidate list per job**
- **Compares candidate profile with job description**
- **Gives suitability score**

Purpose:
To identify best candidates quickly and accurately.

---

3. Voice Screening AI

Responsibility:

- **Conducts initial voice interview**
- **Checks communication skills and confidence**
- **Records and analyses responses**

Purpose:
To save HR time and automate first-round screening.

---

4. HR Interview AI

Responsibility:

- **Asks behavioural and situational questions**
- **Evaluates attitude, teamwork, culture fit**
- **Generates interview report**

Purpose:
To ensure fair and standardized behavioural evaluation.

---

5. Technical Interview AI

Responsibility:

- **Conducts technical question rounds**
- **Tests domain knowledge and problem-solving ability**
- **Scores candidate performance**

Purpose:
To validate candidate technical competency.

---

6. Machine Test Evaluation AI

Responsibility:

- **Evaluates coding tests or practical tasks**
- **Checks correctness, logic, performance**
- **Provides automated grading**

Purpose:
To measure real practical skills of candidates.

---

7. Behaviour Analysis AI

Responsibility:

- **Analyses speech tone, confidence, response pattern**
- **Detects stress level and engagement**
- **Provides personality insights**

Purpose:
To understand candidate soft skills and behaviour.

---

8. Final Decision Engine AI

Responsibility:

- **Combines scores from all interview stages**
- **Applies selection rules**
- **Generates shortlist / reject decision**

Purpose:
To enable data-driven and bias-free hiring decisions.

---

9. Offer Automation AI

Responsibility:

- **Generates offer letter automatically**
- **Sends offer email to selected candidates**
- **Tracks acceptance status**

Purpose:
To speed up hiring closure and onboarding process.

Submission

These AI engines collectively automate the hiring lifecycle, improve recruitment efficiency, ensure fair evaluation, and help organizations make faster and smarter hiring decisions.
